

IC-VCM categories

1. Adipic Acid N₂O Abatement in Adipic Acid Production – part 1
2. Adipic Acid N₂O Abatement in Adipic Acid Production – part 2
3. Afforestation, Reforestation and Revegetation (including Natural Forest Establishment) and Agroforestry
4. Biodigesters (household)
5. Brick Manufacturing
6. Buffer Practices (Field Borders, Riparian Buffers, Grass Waterways)
7. China Adipic Acid
8. Direct Air Capture
9. Efficient Cookstoves
10. Grid-Connected Renewable Energy
11. HFC-23 destruction: HFC-23 abatement from HCFC-22 production - part 1
12. HFC-23 destruction: HFC-23 abatement from HCFC-22 production – part 2
13. Industrial Biodigesters
14. Industrial Energy Efficiency (supply side)
15. Improved Forestry Management
16. Landfill Gas Capture and Utilization
17. Leak Detection / Repair in Gas Systems
18. Light Efficiency
19. Low-Carbon Transport / Electric Vehicles
20. Mini-grids
21. Mine Methane Capture and Utilization for Energy
22. N₂O Abatement in Nitric Acid Production – part 2
23. New Natural Gas Power
24. Nutrient / Nitrogen Low market share and program exclusions Management
25. Ozone Depleting Substances (ODS)
26. Reducing Emissions from Deforestation and Forest Degradation (Jurisdictional)
27. Reducing Emissions from Deforestation and Forest Degradation (Project)
28. Renewable Energy AMS-I.A.
29. Rice Cultivation Methane Avoidance
30. SF₆ Avoidance
31. Sustainable Agriculture (Rotational Crops, Low Till / No Tillage, Structural & Vegetative Practices etc.)
32. Technology-based Carbon Capture and Storage
33. Uncategorized
34. Waste Heat Recovery
35. Water Purification
